

## Pulsar Data

This data set was pulled from Kaggle. It also contains the following information for each sample:

1. mean
2. range
3. outliers
4. asymmetry
5. pulsar

This dataset is good for classification. An example can be found [here](#) and a background on the data can be found [here](#).

You can use the following code to load the data into google colaboratory:

```
import pandas as pd
url = "https://raw.githubusercontent.com/the-codingschool/TRAIN/main/pulsar/pulsar_stars.csv"
df = pd.read_csv(url)
```
